

True Herf Cigar Journal

Your personal humidor, digitized.

<https://superlative-crostata-89b4a2.netlify.app/>

Follow the steps below to install it like a real app — just a few taps, no App Store needed.

iPhone (Safari)

1. Open the link above **in Safari** (not Chrome — Add to Home Screen only works in Safari on iPhone)
2. Tap the **Share** icon at the bottom of the screen (square with an arrow pointing up)
3. Scroll down and tap **“Add to Home Screen”**
4. Tap **“Add”** in the top right

That's it — a True Herf icon now sits on your home screen. Tap it any time to log your smokes, full-screen, no browser bar.

Android (Chrome)

1. Open the link above in Chrome
2. Tap the **⋮** menu in the top right corner
3. Tap **“Install app”** (or “Add to Home Screen” — wording varies by phone)
4. Confirm by tapping **“Install”**

Same result — a True Herf icon on your home screen, opens like any other app.

One thing to know

Your journal is yours alone — entries save right on your phone and don't sync with anyone else's. Log freely.

Enjoy the herf.
